Course description

The course aims to prepare doctoral students to sustain the role of "leader" within a complex organization. The skills acquired can be "spent" both during the doctoral program and after graduation, in the work environment.

The objectives of the course are to provide a set of knowledge and directions for:

- use communication in all its aspects as an effective working tool within any complex organization
- successfully conduct meetings and resolve disputes
- participate in or lead successful working groups
- deal rationally with complex problems
- lead projects of varying sizes in any working environment

Evaluation: YES, multiple choice test
